N.E. COR. -
 S.E. 1/4 -
 SEC. 24

Based on the attached soil test results, an on-site soil based septic system would not be feasible under the current regulations. An Ohio EPA permitted discharging septic system would be necessary when the current septic system needs replaced. The replacement area that has been tested shall remain undisturbed as future changes in the regulations or technological advancements may allow for a soil based system to be used.
