Surveyors Office Helena O. Jan. 30th 1864. Marcus Schuyler. Co. Surveyor
of Mercer Co. Ohio

SURVEY No. 15th day of June, A. D. 1822, in Secs 14, 15, 22, 23 Town 4, of Range 3, at the instance of Philip Miller

In Town 4 of Range 3 East. Plat and Notes of Survey made by me on the

CONDITION OF ORIGINAL CORNERS.

Bellevue Ohio June 16th 1922.
 Being deputized to go upon the ground on the 15th of said month as per notices theretofore given of 20 days and more and being on the ground on said date for the purpose of fixing the corner to sections 14, 15, 22 and 23 Town 4 South Range 3 East Mercer County Ohio and all parties being present
 We FIND

- 1st There are two corners. One corner claimed by one party and the other claimed by the other party.
- 2nd We find that M Schuyler, who was at the time County Surveyor of Mercer County Ohio was at this corner in 1863 and recognized the government

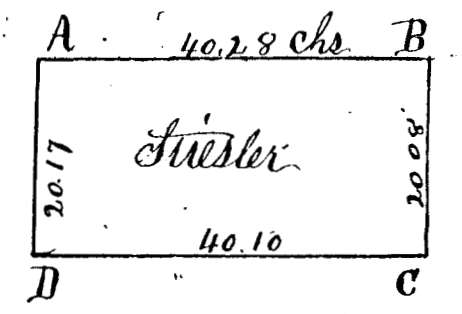

witness trees thereto and in accordance therewith fixed said corner.

CORNERS DESCRIBED.	BEARING TREES.	D.	Course.	Dist.	BEARING TREES.	D.	Course.	Dist.
3 rd We find that J.M. DeFord, who was at the time County Surveyor was at said corner in his survey of section 15 same Town and Range and also recognized the said government witness trees and also found the East $\frac{1}{4}$ Post to said section as well as the government witness trees thereto, and als had also been noted by the said Schuyler								
4 th We find that in conformity therewith said J.M. DeFord in September 1888 fixed the equal division corner between said the said $\frac{1}{4}$ Post and the said section corner and that he took a witness tree of a wild cherry 12.571 E 75. We mark cement fence Post S 63 E 28. That he also, to perpetuate said the corner to said sections, he took a witness white oak 12.533 $\frac{1}{2}$ W 89 links.								
5 th We find that by aligning the stones from said $\frac{1}{4}$ Post to said section corner through said equal division corner that said alignment strikes the westernmost of said stones, and we also find that the proposed measurement comes practically to said westernmost of said stones.								
6 th Agreeing therewith we find the remains of the said white oak at the point designated in the ad.								
7 th We find that to call the easternmost of said stones the corner that the line from said $\frac{1}{4}$ post to said section corner would have such a crook in it as that in extending the line from said easternmost of said stone through the stone planted for the equal division corner to said $\frac{1}{4}$ Post that it would thereto the point about 7 feet west of where said $\frac{1}{4}$ Post stone is now located. We therefore, find that said westernmost stone is at the original section corner to said sections
